CAPTURE up to 60 hours of high-resolution SaO₂ data for evaluation

UPLOAD to the new VirtuOx Professional Edition web-based system, eliminating software

AUTOMATIC recording with good study indicator features

RECHARGEABLE lithium ion battery

Introducing **VirtuOx Professional Edition** from Airway Management. A complete web-based **Patient Management System** for Oral Appliance Therapy (OAT) that utilizes data storage via individual patient portals, eliminating the hassle of software and paper files. It is a cost-effective screening system for Sleep Disordered Breathing (SDB) that uses both a high-resolution pulse oximeter device and a web-based portal for reviewing and managing patient data.

VirtuOx Professional Edition is a web-based application and does not need to be installed on a PC, unlike similar products. Data is backed up daily on secure servers and can be accessed from any PC with an Internet connection.

VirtuOx Professional Edition uses an Executive On-Demand Dashboard that lets you conveniently manage all of your patients from start to finish, including long term follow-up. You may input patient demographics and sleep records in accordance with medical billing parameters. An optional medical billing feature is available.

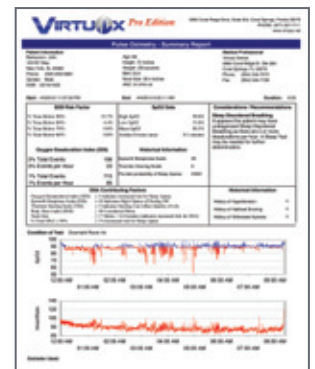

VirtuOx Professional Edition offers both a one-page summary report and a multiple-page detailed report. Both styles are easy to read and include real time data as well as summary reports, trending and graphs.

VIRTUOX PROFESSIONAL EDITION FEATURES:

- Specially designed for sleep screening and management of OAT patients and devices
- Patient demographic and sleep data stored in secure, dedicated patient portals
- Patient screening via Oximeter upload and reporting with a highly accurate indicator of Sleep Apnea range
- Ability to coordinate/order a Home Sleep Test (HST) or Polysomnogram (PSG)with the patient's physician
- Patient Sleep Record creation/storage complete with physician notes, prescriptions and sleep studies
- Includes Oral Appliance medical billing capability
- Unlimited web system usage for \$30 per month, medical billing is additional

Secure, patient-specific portals

Summary and detailed reports
